SIRVIS SECURE FOR THE CHANNEL

Introducing SirviS Secure, your go-to partner for complete cyber and physical security solutions tailored specifically for the Channel, including Value Added Resellers (VARs) and Managed Service Providers (MSPs). At SirviS, we understand the ever-evolving landscape of security threats and the critical need for robust security measures. That's why we've curated a comprehensive suite of cutting-edge security solutions to help you safeguard your clients' data and infrastructure.

EXPERTISE

Our team of experts has years of experience in physical and cybersecurity, and we are dedicated to providing you with the most advanced consulting, tools, and technologies to combat cyber and physical threats effectively. From network security and endpoint protection to data encryption and vulnerability assessments, we've got you covered.

CHANNEL PARTNERS

What sets SirviS Secure apart is our commitment to building strong partnerships with our Channel partners. We understand that your success is our success, and we are here to support you every step of the way. Our tailored solutions are designed to seamlessly integrate into your existing offerings, empowering you to deliver top-notch cyber and physical security services to your clients.

EXPAND YOUR EXPERTISE, VALUE & INCREASE REVENUES

With SirviS Secure, you can expand your portfolio, enhance your reputation, and increase your revenue by offering best-in-class security solutions. Stay ahead of the curve and ensure your clients' peace of mind with our comprehensive suite of security services.

So, whether you're a VAR or an MSP, let SirviS be your trusted security partner. Get in touch with us today and let's embark on this SirviS Secure journey together!

SIRVIS SECURE FOR THE CHANNEL

SirviS Secure employs a comprehensive and meticulous approach to both physical and cyber security, ensuring robust protection for our clients. The process begins with customer engagement, where we collaborate closely to understand their unique requirements and challenges. This initial engagement sets the stage for the development of a tailored assessment, defining the scope and objectives of our security solutions.

Our next steps involve engaging partners and conducting a thorough assessment, including the creation of an interdependency map, a threat model, and a comprehensive findings and recommendations report. This detailed analysis is then reviewed with the client, fostering transparency and alignment with their objectives. Subsequently, we embark on risk management, implementing enhancements based on the identified vulnerabilities. We maintain an ongoing commitment to conformance monitoring, ensuring that our security measures evolve in tandem with emerging threats. This holistic process allows SirviS Secure to provide proactive and resilient security solutions for your clients.
